Twin High-Gain Low-Noise 40mm LNB

IDLB-TWNL40-ULTRA-OPP

This LNB is a high performance product featuring the lowest noise figure available to address the need for superior reception under the edges of the satellite footprint skirt. Thanks to its novel front-end architecture and superior components, this LNB provides higher conversion gain yet with lowest noise figure and best phase noise performance. The combination of higher spec components, excellent isolation and advanced filter design enables improved handling of interfering spurious and provides the leap in the overall reception performance compared with standard LNBs. This LNB enables the reception of signal from one satellite, its distribution to up-to two single tuner Set-top box (or 1 in the case of a twin-tuner STB) and is ready for High Definition transmissions. Manufactured to the highest industry quality standards and designed to meet strict specifications, this LNB is an ideal solution for the satellite broadcast reception across Europe.
